

BONUS multiple-choice sections: 2 (math), 7 (reading comprehension), 4 (writing)

Directions:

When you have completed these sections, you'll be turning in the questions and the answer sheet together because I will be assessing you not based on the number of questions you get correct but on the evidence that you have worked through each question. **For each question, you must clearly cross through any answer choices you can eliminate as being incorrect.**

- For section 2 (math), you need to work each problem in the space beneath the question.
- For section 7 (reading comprehension) questions 1-8, you must circle the context clues that suggest the answer and define any words in the answer choices that you do not know.
- For section 7 (reading comprehension) questions 9-24, you need to circle the crucial words in each question and underline parts of the reading passage that help you to answer the questions.
- For section 4 (writing) questions 1-11, you need to circle the subject and predicate of the sentence as well as place prepositional phrases in parentheses.
- For section 4 (writing) questions 12-29, you need to circle the subject and predicate of the sentence as well as place prepositional phrases in parentheses.
- For section 4 (writing) questions 30-35, you need to circle the crucial words in each question and underline parts of the paragraph that help you to answer the questions.
